

Field Allocation Draft Rules

The Cosumnes CSD employs a draft system to allocate athletic fields. There are two separate drafts, one for recreation and one for competitive programs. The following guidelines will be employed by CSD staff administering these drafts:

1. Draft order will be assigned at random.
2. A serpentine, or "snake", draft format will be used.
3. Trades are not allowed during the draft. After the draft, organizations are encouraged to work together throughout the allocation period to help meet each other's needs. Any changes to the allocation must be approved by Cosumnes CSD. Recreation programs may not secure fields on behalf of competitive programs.
4. The draft will be divided into the following stages:
 - a. Recreation Programs
 - b. Competitive Programs
5. Organizations will have two minutes to make each selection. If two minutes elapse without a selection, that pick will be forfeit and the draft will move on to the next organization as defined by the draft order.
6. The draft will continue until each organization's needs are met or all available sessions/fields have been allocated.
