

Cosumnes Community Services District
Engineering Services RFP Questions and Responses 2012

1. **Why is the CSD currently pursuing this RFP?** The current contract is expired and the Cosumnes CSD Board policy requires multiyear contracts go through the RFP process.
2. **Have there been any challenges or extensive review of the special and general benefits (proposition 218 primarily?) on the district wide L&L?** The annual Engineer's Report includes substantial analysis supporting the special and general benefits. To date, the CSD has not received any challenges to this methodology.
3. **Please describe the requirements and also additional desires of the CSD for the “online assessment database” as noted in the Scope of Services.** The minimum requirements are identified in the second to last bullet of the Scope of Services on page 4 of the RFP. You may choose to include other features as part of your proposal.
