The theme for the Sterling Meadows Community Park is music. Just like music accompanies life, the musical theme is present throughout the park. The primary circulation and path design through the park is derived from a key musical element - the treble clef. Interior pathways curve and meander resembling this musical symbol. The play areas and water play areas are envisioned to contain equipment that is music-themed. Plazas and the water play area have musical notes and symbols inlaid into the pavement, reinforcing the musical theme.
